FuturaStock Electronic Baling Machine

The outstanding features of the FUTURASTOCK series
of baling machines are their **very high productivity** and their
great **versatility** to group bags of different sizes into many **different
bale configurations**. Designed for every customer's needs, the Selgron
baling machines employs the highest technology in digital electronics,
pneumatics components and precision mechanics, as well as,
an **exclusive (Patented) metering/feed system**, and full domain
of **interlinking technology**. Our baling machines are used for rice, beans,
and cereals in general, as well as, sugar, toasted coffee, farinaceous
goods and other products upon inquiry. The Selgron baling machines
are designed to operate in a continuous regime of 24 hoursper day,
which provides for **high productivity levels**. All of this
is due to their very high degree of **reliability**.

- High Productivity
- High Cost Saving of Film
- Interlinking Technology
- Easy Operation
- Flexible Grouping Modes

TECHNICAL FEATURES

Maximum film width	1100 mm
Maximum coil outer diameter	300 mm
Basic machine net weight	950 kg
Power Consumption	800 w
Power Supply Requirements	220 / 440 V
Frequency	50 / 60 Hz
Compressed air consumption	700 l/min
Required Air Pressure	7 bar

Authorized Technical Service Network available in several countries. Please contact us.
